The following is an examiner's statement of reasons for allowance:

The prior art of record neither teaches nor suggests a catalyst composition comprising distinct Fischer-Tropsch catalyst particles and distinct catalyst particles comprising zeolite Y, in another words the Fischer-Tropsch catalyst is not incorporated into zeolite Y, in order to have maximum isomerization activity and having Fischer-Tropsch activity with a water adsorption capacity of at least 16 wt%, wherein the particles comprising zeolite Y have not impregnated with a metal having Fischer-Tropsch activity. Nor would it have been obvious to modify the catalyst composition of the prior art to arrive at the catalyst composition of the instant claimed invention. There is no motivation to do so.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
